## TransCanada's Enhanced 2014 CSR Report Demonstrates Commitment to Continuous Improvement

CALGARY, Alberta – June 3, 2015 – TransCanada Corporation (TSX, NYSE: TRP) (TransCanada) officially released its [2014 Corporate Social Responsibility \(CSR\) Report](#) ([csrreport.transcanada.com](http://csrreport.transcanada.com)) today. The 2014 CSR Report was released during Canadian Environment Week as a testament to the company's focus on CSR and commitment to operating safely and in an economically, socially and environmentally sustainable manner.

"The growing global demand for energy has generated discussion around how we access the important resources we rely upon," says Russ Girling, TransCanada's president and chief executive officer. "As a leading energy infrastructure company, we are taking a collaborative approach to the sustainability conversation."

In 2014, TransCanada continued to deliver energy to North Americans, safely and responsibly. This includes 20 per cent of the natural gas consumed across the continent, 20 per cent of Canada's crude oil exports to U.S. markets and enough energy to power 11 million homes, with over 30 per cent generated from emission-less sources.

"For over 60 years, we have considered every business decision in terms of our ability to deliver the energy that North Americans need, safely, reliably and responsibly every day," says Girling. "Today we recognize operating responsibly means working even more closely with our stakeholders as we build projects to meet the growing global demand for affordable energy."

### Performance areas highlighted in the 2014 CSR Report include:

#### SAFETY

- Invested \$1.3 billion in pipeline integrity and preventative maintenance programs
- Completed more than [120 emergency exercises and drills](#) across our network of assets

#### SOCIETY

- Generated \$104 million in work for Indigenous business or their joint-venture partners
- Directed more than \$14.6 million to over 1,400 non-profit organizations across North America

#### ENVIRONMENT

- Received a score of 99A- from the [CDP \(formerly the Carbon Disclosure Project\)](#) and ranked second in disclosure out of 200 of Canada's largest companies
- Engaged more than 900 scientists and over 180 municipalities in the Energy East Pipeline Project's [environmental and socio-economic impact assessment](#), received environmental assessment certificates for the [Coastal GasLink](#) and [Prince Rupert Gas Transmission Projects](#) and the January, 2014 release of [Keystone XL's Final Supplemental Environmental Impact Statement](#) by the U.S. State Department indicated the project would have minimal impact on the environment

#### ECONOMY

- Paid \$582 million in income and property taxes that help pay for things such as schools, roads and hospitals

- Generated net income attributable to common shares of \$1.7 billion (\$2.46 per share) for the year ended December 31, 2014

With more than 60 years' experience, TransCanada is a leader in the responsible development and reliable operation of North American energy infrastructure including natural gas and liquids pipelines, power generation and gas storage facilities. TransCanada operates a network of natural gas pipelines that extends more than 68,000 kilometres (42,100 miles), tapping into virtually all major gas supply basins in North America. TransCanada is one of the continent's largest providers of gas storage and related services with 368 billion cubic feet of storage capacity. A growing independent power producer, TransCanada owns or has interests in over 10,900 megawatts of power generation in Canada and the United States. TransCanada is developing one of North America's largest liquids delivery systems. TransCanada's common shares trade on the Toronto and New York stock exchanges under the symbol TRP.
